PERSONAL PROJECTS

Student Management System
- A Student Management System is also known as a Student Information System (SIS). These systems work to coordinate scheduling and communications between faculty regarding students.
- It helps to manage all the student related data in a well-organized manner and a Student Management System gives you a unique ID against every student.
- Using that ID, we can easily track the fee status, assignments, exam results, grades, parent info within seconds.
- Skills Used : HTML, CSS, Java Script
